

Vishnu Teja

MLOps / Cloud Engineer | Kubernetes | AI/ML Infrastructure | CI/CD
9000127904 | vishnu107109@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

MLOps / Cloud Engineer with **1+ year of professional experience** in Kubernetes, Docker, CI/CD, cloud infrastructure, Linux, DevSecOps, and deployment automation, complemented by a strong foundation in **machine learning and deep learning**. Experienced in deploying and troubleshooting enterprise workloads across **Azure, GCP, and on-premises environments**, automating multi-stack deployments, developing GitHub Actions pipelines, and building secure container images. Hands-on experience with **Kubernetes cluster setup, Python, ML workflows, distributed systems, and AI infrastructure**.

EXPERIENCE

Infosys

August 2025 – Present

Specialist Programmer

- Orchestrated production and client-side application deployments concurrently across Azure, GCP, and on-premises environments, strictly adhering to enterprise compliance and client-specific deployment standards.
- Spearheaded DevSecOps initiatives by implementing hardened container base images and automated vulnerability scanning, significantly reducing the attack surface across a wide range of open-source and proprietary applications.
- Automated multi-stack deployment workflows via GitHub Actions and shell scripting, slashing delivery timelines from several days to under a few hours while ensuring reliable, zero-downtime releases.
- Managed and scaled a diverse portfolio of Kubernetes-native workloads, taking ownership of everything from comprehensive monitoring/logging stacks to complex application services.
- Troubleshoot and resolved critical production incidents involving cluster networking, container orchestration, and dependent microservices, maintaining high availability and system reliability.

Cloud Computing Intern

June 2023 – December 2023

NIT Surathkal

- Provisioned and managed distributed Azure cloud infrastructure and virtual machines to support high-performance research computing workloads.
- Designed and deployed highly available Kubernetes clusters from scratch using kubeadm, optimizing control-plane and worker node configurations for experimental AI/ML deployments.
- Resolved complex container, networking, and cluster-level bottlenecks across multiple environments, ensuring reproducible and resilient infrastructure for academic research.

TECHNICAL SKILLS

DevOps & CI/CD: GitHub Actions, CI/CD Pipelines, Deployment Automation, Shell/Bash Scripting, Git, Containerization

Cloud & Infrastructure: Azure, GCP, Kubernetes, Docker, Linux, Virtual Machines, On-Premises Infrastructure

Kubernetes: kubeadm, kubectl, Cluster Setup, Application Deployment, Container Management, Cluster Troubleshooting

Programming: Python, C++, C, Java

MLOps & AI: Machine Learning, Deep Learning, PyTorch, TensorFlow, ML Workflows, Model Deployment, Computer Vision, NLP, RAG

AI / Data Tools: LangChain, FAISS, DBMS, Gradio

EDUCATION

National Institute of Technology Andhra Pradesh

B.Tech. in Electronics & Communication Engineering; Minor in AI for Signal Processing

2021 – 2025

CGPA: 8.2/10

PROJECTS

ConsistentI2V – Video Generation | *Python, PyTorch, Gradio*

GitHub

- Developed a deep-learning based video generation approach focused on maintaining **spatial and temporal consistency** across generated video sequences.
- Achieved **53.62% appearance consistency** in human evaluations and developed FrameInit, a layout-guided noise initialization technique using low-frequency information from the first frame to improve video stability.

Logsscan Plus – Remote Sensing Segmentation | *Python, PyTorch*

GitHub

- Developed a semantic segmentation model incorporating **Global Class Awareness (GCA) and Local Class Awareness (LCA)** for remote sensing imagery.
- Analyzed multiple remote sensing datasets and evaluated dataset characteristics and model limitations to identify opportunities for improving segmentation performance.

RESEARCH PUBLICATION

Multi Criteria Based Container Management in a Geo-Distributed Cluster

Vishnu Teja M., M.R. Naveen Kumar, D.R. Annappa

IEEE Connect, Track 5, 2024

ADDITIONAL PROGRAM

Amazon ML School 2024

July 2024 – August 2024

Amazon

- Selected for Amazon ML School 2024, covering **machine learning, deep learning, large language models, and scalable ML deployment on AWS**.
- Strengthened practical understanding of neural networks, modern ML architectures, and production-oriented machine learning workflows.

ACHIEVEMENTS

GATE 2025 (Data Analytics): Secured All India Rank **915**.
